

Alif AMS — Asset Management System

ASSETS

Track, maintain and optimise every asset across its complete lifecycle — from equipment to vehicles to IT infrastructure.

OVERVIEW

Alif AMS helps organisations efficiently track, maintain and optimise their assets throughout their entire lifecycle. Whether you manage equipment, vehicles or IT infrastructure, AMS ensures every asset is monitored, maintained and utilised effectively.

KEY FEATURES

● Real-Time Asset Tracking

Monitor location, condition and utilisation of every asset as it happens.

● Automated Request & Allocation

Streamlined workflows for requesting and assigning assets.

● Material & Service Tickets

Log and manage service tickets tied directly to each asset.

● Preventive & Scheduled Maintenance

Stay ahead of breakdowns with planned maintenance cycles.

● Purchase & Warranty Tracking

Keep full purchase, warranty and lifecycle records in one place.

● Maintenance Scheduling & Alerts

Automatic reminders keep maintenance on schedule.

WHY TEAMS CHOOSE ALIF AMS

- Reduce downtime with preventive maintenance
- Increase asset lifespan and ROI
- Simplify audits with centralised records
- Make data-driven decisions with smart dashboards
