

Alif MFG — Production & Manufacturing Solution

NEW · MANUFACTURING

Plan production, control the shop floor, and manage quality — from raw material to finished goods.

OVERVIEW

Alif MFG connects production planning, shop-floor execution, material consumption and quality control in one system. Manufacturers get a clear, real-time picture of what's being produced, what it costs, and where bottlenecks are forming — before they become a problem.

KEY FEATURES

● Production Planning

Schedule production runs against demand, capacity and material availability.

● Bill of Materials & Consumption

Manage BOMs and track material usage against plan.

● Production Costing

Understand true cost per unit across labour, material and overhead.

● Shop Floor Control

Track work orders and machine/operator output in real time.

● Quality Control

Define quality checkpoints and capture inspection results digitally.

● Downtime & Maintenance Alerts

Reduce unplanned stoppages with proactive alerts.

WHY TEAMS CHOOSE ALIF MFG

- Improve on-time production delivery
- Reduce material wastage and rework
- Get real-time shop floor visibility
- Make costing and pricing more accurate
