

Alif RMS — Restaurant Management System

HOSPITALITY

Complete control for smarter restaurant operations — from central kitchen to POS and mobile.

OVERVIEW

Alif RMS is a comprehensive, all-in-one platform designed to streamline operations, improve efficiency and provide complete control over your restaurant business. From central kitchen operations to POS and mobile applications, the system ensures seamless integration across every department.

KEY FEATURES

● **Central Kitchen Management**

Coordinate production across multiple outlets from one hub.

● **Inventory Control**

Track stock in real time to cut waste and avoid shortages.

● **Point of Sale (POS)**

A fast, reliable POS built for high-volume service.

● **Recipe & Menu Management**

Standardise recipes and manage menus with precise costing.

● **Costing & Profitability**

Understand true margins on every dish and outlet.

● **Mobile Applications**

Order, manage and report on the move.

WHY TEAMS CHOOSE ALIF RMS

- Improved operational efficiency
- Reduced wastage & better cost control
- Data-driven decision making
- Centralised visibility across all outlets
