

Alif SCM — Supply Chain, Inventory & Stores Management

NEW · SUPPLY CHAIN

End-to-end visibility across procurement, inventory, warehousing and stores — on one connected platform.

OVERVIEW

Alif SCM gives you control over the full supply chain — from purchase requisition and vendor management through to warehouse operations and multi-location stores. Real-time stock visibility and automated workflows mean fewer stockouts, less overstocking, and tighter cost control.

KEY FEATURES

● Procurement & Purchasing

Requisitions, approvals and purchase orders in one workflow.

● Multi-Store & Transfer Management

Move stock between stores with full traceability.

● Demand Forecasting

Plan stock levels using historical and seasonal demand data.

● Warehouse & Inventory Management

Real-time stock levels across every location.

● Vendor & Supplier Management

Track vendor performance, pricing and contracts.

● Quality & Compliance Checks

Ensure incoming and outgoing stock meets your standards.

WHY TEAMS CHOOSE ALIF SCM

- Reduce stockouts and overstocking
- Cut procurement cycle times
- Full traceability from supplier to store
- Lower carrying costs with better forecasting
